

Stora-R-P-50-DSC-950-DPS

Round surface suspended luminaire made of extruded aluminum profile with a total height of 50mm, without rear driver housing or other structures that influence the clear and flat cylindrical shape.

All operating devices and terminals are integrated in the housing and ensure efficient utilization of the mid-power LEDs for direct and indirect components. The light is deflected by a highly transparent microprismatic PMMA disc for BAP-capable glare limitation (UGR <19). Suspension via tool-free adjustable steel cable pendulum (L1500mm), transparent connection cord. Driver DALI dimmable.

Dimensions: D950 / H50mm

LED luminous flux: 12.000lm at 92W
